DETAILED ACTION

1. Applicant's amendment, filed 8/3/06, has been entered.
Claim 21 has been amended.

Claim 21 is pending.

Claims 1-20 and 22-35 have been canceled previously.

REASONS FOR ALLOWANCE

2. The following is an Examiner's Statement of Reasons for Allowance:

Upon reconsideration of applicant's amendment, including the amended claims, filed 8/3/06; the previous rejection under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-7 U.S. Patent No. 5,824,655 has been withdrawn.

Claim 21 stands provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-2, 5-7, 10 and 13-15 of copending application USSN 10/638,172 for the reasons of record.

Again, applicant notes that if the provisional double patent rejection is the only remaining rejection and the copending application has not been placed in condition for allowance, the double patenting rejection is requested to be withdrawn.

Given that a provisional double patenting rejection over copending USSN 10/638,172 would be the only rejection remaining in this application; such a provisional obvious double patenting is withdrawn to permit this application to issue.

See MPEP 804.

The claimed methods of decreasing the deleterious accumulation of extracellular matrix associated with a pathology or a condition wherein TGF- β -induced production and deleterious accumulation of extracellular matrix in a tissue exists comprising providing an anti-TGF- β antibody that binds to TGF- β appears to be free of the prior art. Accordingly the instant claim is deemed allowable.

Given applicant's Remarks in the Amendment, filed 8/3/06; a Sequence Listing is not required to be filed in the instant application, given the priority of the present continuation application as least of 10/3/89.
